EDUCATION

International Institute of Information Technology (I²IT) <i>Bachelor of Engineering in Information Technology</i>	Pune, Maharashtra 2022 – 2026
Shramik Junior College <i>Higher Secondary Certificate (HSC)</i>	Sangamner, Maharashtra 2022
Bhagwati Mata Vidyalaya Nandur <i>Secondary School Certificate (SSC)</i>	Sangamner, Maharashtra 2020

ACHIEVEMENTS & LEADERSHIP

IEEE Women's Hackathon – Web Queen's Challenge 2025 <i>Organized by IEEE I²IT Student Branch</i>	25 Sep 2025 Rank 1
• Secured first place in a frontend web development hackathon by building a responsive and user-centric web solution	
ITSA Management Team <i>International Institute of Information Technology, Pune</i>	2022 – 2025
• Led the planning and execution of technical events and workshops within the IT department	

TECHNICAL SKILLS

Languages: Java, Python
Frontend: React.js, HTML, CSS3, Tailwind CSS, JavaScript, Material-UI
Backend: Node.js, Express.js, Flask, REST APIs, FastAPI
Databases: MySQL, MongoDB Atlas
Data Science & ML: Machine Learning, Scikit-learn, NumPy, Pandas, OpenCV, Matplotlib, Seaborn
Fundamentals: Data Structures and Algorithms (DSA), Object-Oriented Programming (OOP), Database Management Systems (DBMS)
Developer Tools & Platforms: Power BI, Tableau, Git, GitHub, Postman, MS Excel, VS Code, AWS EC2

PROJECTS

KrishniSathi – Complete Farmer Assistant <i>Flask, React.js, MySQL, ML, OCR, RAG</i>	
• Developed an AI-powered farmer assistance platform integrating 5 major modules, including a multilingual chatbot support, equipment rental, and government scheme recommendations	
• Implemented a crop disease prediction system trained on 55,000+ leaf images, achieving 92% accuracy	
• Built a fertilizer recommendation system achieving 90% accuracy on 1,500+ agricultural records	
AI Wine Expert <i>Flask, ML, React.js, SHAP</i>	feb – mar 2025
• Engineered an AI-powered web application utilizing 11 key input features	
• Developed robust REST APIs and responsive React dashboard for real-time predictions	
• Integrated SHAP to enhance model interpretability, achieving 90% accuracy on the UCI Wine Quality dataset containing 6,400+ samples	
Blood Donation & Inventory Management Platform <i>React, Node.js, Express.js, MySQL</i>	May – Aug 2023
• Built a full-stack blood donation platform supporting 4+ user roles, including donors, hospitals, and blood banks	
• Developed 10+ secure REST APIs for donor registration, blood requests, camps, and inventory tracking	
• Implemented JWT authentication with HTTP-only cookies for secure user authentication and authorization	
• Designed a relational MySQL database schema and implemented real-time inventory updates to automate blood stock management and request handling
